

Electric Vehicle Ride Share Pilot Program

Anaheim Public Utilities' NEW Electric Vehicle (EV) Ride Share Pilot Program is a clean, sustainable, no-cost ride sharing program exclusively designed for residents of affordable housing developments.

The program provides rebates to offset the costs of leasing, maintaining and operating EVs for residents in multi-family affordable housing developments and communities that may lack access to EVs. It's a great way for properties to offer an added amenity to their residents at NO COST during the three year pilot program.

For more information, call **714-765-4952** or visit **ANAHEIM.NET/UTILITIES**
